

Assignment for Lecture 2

HTML - CSS

Break down this page using the approach we took in the class

<https://getbootstrap.com/docs/4.0/examples/blog/#>

You can use this as the sketchboard tool to practice (No need of any submissions of outline structure)

<https://sketchboard.me/>

Create HTML for the above design and submit

JS

For the following problems, please breakdown and give precise instructions as to how would you go about telling a computer to solve the problem, give as much details as possible

1. Find the square of a given number
2. Look at the time of the day and tell whether it's time for breakfast, lunch or dinner
3. Given a number, find whether the number is odd or even
4. Find out whether a given number or a string is palindrome(something that looks the same reading straight or in reverse)
5. Find the 10th number of a fibonacci series(research about this)
